Secondary Supervisor name and
email address:

1. Industry Project Name/Title:

2. Industry Project Brief Statement:

Please provide a succinct statement to describe your project. This should summarise the challenge or opportunity that you would like the student team to address. (200 words)

3. Project Drivers:

Please provide a short statement about the inspiration or need that will drive this project. It is important that students understand the overall desired impact of the project they will be undertaking. (200 words)

- *Why is this project important to your organisation?*
- *How could the project benefit your organisation or the community in the future?*

4. Expected Outcomes:

Please explain the core activities, milestones, and deliverables you are seeking at the end of the project. For example: tangible products, user benefits, system interface etc. (400 words)

Activities:	
Milestones:	
Deliverables:	

5. Essential Knowledge:

What knowledge/skills do the students require to undertake this project successfully? For example: Mobile App Ui Design, MS and Google Cloud, Python Programming Language etc. (200 words)

6. Project Resources and Data Sources:

- *What types of resources and data sources are required to run this project (if any)?*
- *Which will you provide, and which may need to be investigated or sourced by the student group? (200 words)*

7. Other Information:

If there are critical areas of your project not addressed above, please provide more information here.
